

## Logic Model - Goal by 2020

Critical early childhood local and statewide infrastructure will be in place and delivering increased accessibility, affordability and high-quality

RESOURCES STRATEGIES SHORT-TERM OUTCOMES OUTCOMES COMMUNITY

Focused volunteer and state agency engagement

Established networks

Content and process expertise

Access to available data and technology

Active participation of decision-makers

Ability to leverage and influence funding

Access to policymakers

Dedicated 'backbone' support

Access to subject matter experts

Establish Baselines

Provide System Development Tools

Facilitate Community Partnerships

Demonstrate Impact

Secure Resources

Data on current state of ECE in Indiana is centrally located, readily accessible and increasingly utilized

Infrastructure, definitions, frameworks, toolkits, self-assessments, and action steps are developed based on best practices and readily accessible

Community coalitions with essential partners at the table are sharing what's working locally-within and outside the community

Child, family, workforce, and classroom outcomes are routinely assessed for continuous improvement

Additional public and private dollars are available to support expansion of documented outcomes Progress by stakeholders toward goals is routinely tracked

Infrastructure, definitions, frameworks, toolkits, self-assessments, and action steps are routinely used by state and community stakeholders and leading to positive outcomes

The number of communities with formal early childhood collaborations is increasing and achieving measurable outcomes

Child, family, workforce, and classroom outcomes show a significant impact from investments

Infrastructure improvements are in place to support expanded participation in high quality care and education

High quality early childhood care and education will be:
