

Summarize this workgroup's successes in 2017:

1. Published data toolkit to help individuals find appropriate data to tell/support their story.
2. Enhanced the Annual Report.
3. Connected accessibility to ELAC data through the report, profiles and interactive data

Summarize workgroup's short-term priorities for 2018:

1. Create a data hub to simplify the data collection process for accessibility purposes.
2. Leverage the information we have on outcomes.
3. Identify the data bridge with the data system
4. Expand the data to include health data in the next assessment.

How does the work of this group help fulfill ELAC's 2020 goal?

1. Achieving kindergarten readiness.
2. Aligning communities around best practices.
3. Accessible for all children and families.
4. Affordable for at-risk families.

Note any information needs, data requests, or cross-workgroup collaboration

1. What is realistic in terms of a pull-date?
 - a. What can we do?
2. Determine how data can align with different sources
 - a. Need a unique identifier for children (SPN/ STN)
3. Examine the data sources:
 - a. What data can we get?
 - b. How can we display the data?
 - c. What is the timeline?
4. How can ELI data center data be used for the all-encompassing data center, including kindergarten readiness, other data required for ELAC statute? What other data can be pulled real-time?
